### DETAILED ACTION

The prior art rejection is maintained and repeated below.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 5 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Publication Nos. 20050075400, 20050014949, 20040181089, 20040116526, based on applications by Yahalomi et al. (collectively "Yahalomi").

Yahalomi teaches nateglinide G-type crystals, see for example, Figs. 6 and 40. Those physical characteristics covered by the claims are invariably possessed by the crystalline forms disclosed by Yahalomi, see MPEP 2112.01 ("Products of identical chemical composition can not have mutually exclusive properties." A chemical composition and its properties are inseparable. Therefore, if the prior art teaches the identical chemical structure, the properties applicant discloses and/or claims are necessarily present. *In re Spada*, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990)").

Applicant argues that the Form G disclosed in the references is different than that of the rejected claim. Namely, Applicant argues that the instant Form G is not an isopropyl solvate, as disclosed in the references. However, there is no objective evidence on file avering that the form G disclosed by the references does not also have the infra-red or Raman intensive bands recited by the rejected claims, and the rejected claim does not require those product by process steps which do not include isopropyl alcohol or isopropyl solvates.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
